VITALOGRAPH PNEUMOTRAC

The Ideal PC-Based Spirometer for General Healthcare and Occupational Health

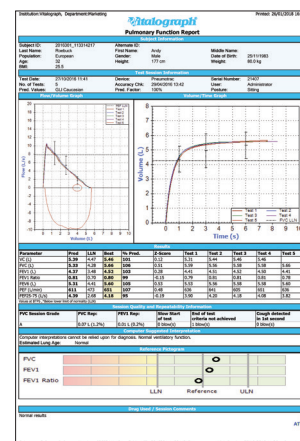

The Vitalograph® Pneumotrac™ is the ideal PC-based spirometer for adult and paediatric use within general healthcare and occupational health. Pneumotrac is supplied complete with powerful software and connects directly to your laptop or PC via USB.

Intuitive and easy to use Spirotrac® Software provides the perfect environment for data collection, storage and trend analysis and includes the latest GLI predicted equations and Z-scores.

Integrated HL7 and GDT communication interfaces provide the platform for test data exchange with compatible electronic medical record (EMR) systems.

- Powerful and flexible PC-based spirometer
- Resilient, lightweight and compact design
- Suitable for adults and paediatrics
- Durable Fleisch measurement technology with no moving parts
- No need for expensive disposable sensors, turbines, or flow tubes
- Optimal hygiene via Vitalograph Bacterial Viral Filters (BVF™)
- Powerful Spirotrac Software with real-time curves, interpretation and data trending
- Choice of child friendly incentive animations to help improve subject cooperation
- Intuitive Spirotrac Software future-proofs your service through various PC expansion options including interfacing with your network and electronic medical record (EMR) systems
